Blackened Steel	4,400
Brass	7,200

The Otomo Floor Mirror is a contemporary design which brings simplicity and movement to a normally static but essential bedroom fixture. Minimal in style yet conceived to represent a geometric, Futurist positioning of a contrapposto figure. A walnut back is opposite a custom cut floating glass front and framed by a deep, handcrafted blackened steel patina. All of the elements of this piece combine for a clean, contemporary hard-lined look and feel. The impressive overall size of the Otomo Floor Mirror leaves nothing out of the frame making for a more comfortable and enjoyable experience. Pictured in a blackened steel frame, mirrored glass, and natural walnut back.
